

Environmental Policy

- We shall assume full responsibility throughout our production chain by understanding, and complying with, applicable laws, requirements, and expectations from our stakeholders.
- We shall examine and assess materials and components already during the design and purchasing process with the intention of, if possible, choosing more environmentally friendly alternatives.
- We shall minimize our negative impact on the environment by hiring local suppliers when reasonable.
- We shall look at our products from a lifecycle perspective and, to the best of our ability, support our customers in their environmental work.
- We shall work actively with reuse, separation, and recycling of materials to promote sustainable development for the benefit of current and future generations.
- All employees shall be committed to the environmental work and thereby contribute to continuous improvement of our environmental management system.

Ola Wallster

CEO of Robot System Products in Scandinavia AB
